

Model:

Brightfield condenser

Description:

Optical condenser for transmitted brightfield observation

*0.7 N.A. model M-1154**0.9 N.A. model M-1150**1.2 N.A. model M-1151**0.2/0.9 N.A. model M-1155***Numerical aperture**

Models available:

- 0.7 (long working distance suitable for upright metallographic microscope)
- 0.9 (general purpose, works also with 10x objective)
- 1.2 (highest numerical aperture, best for oil immersion 100x objective)
- 0.25/0.9 (needed to work with 2x objective)

Optics

Swing-out single frontal lens.

Diaphragm

Iris aperture diaphragm, with numerical aperture scale.
