

Model:
Phase Contrast Universal condenser

Description:
Optical condenser for transmitted brightfield, darkfield and phase contrast observation.

Numerical aperture	1.25.
Optics	Fixed frontal lens.
Diaphragm	Iris aperture diaphragm (for brightfield observation).
Positions	<ul style="list-style-type: none">- Brightfield.- Darkfield (dry).- 10x/20x phase contrast.- 40x phase contrast.- 100x phase contrast.
